

Pere Marquette River Area

The lettered spots on this map are suggested as possible rest areas.

- A – Pere Marquette Memorial.
- B – South State Road Bridge.
- C – Scottville Riverside Park.

The trip from Scottville to the State Road Bridge is through a swampy area where the river is very shallow and deep. Below Scottville the river spreads out. By taking the south channel you eventually come into open water. This is a long trip with no landings between Scottville and the Bridge.

The Pere Marquette River is 66 miles long and is a designated National Wild and Scenic River – great for canoeing and fishing.
